EDUCATION

Georgia Institute of Technology | *B.S. in Computational Media (Computer Science Media)* May 2028

- Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Objects and Design, Computational Media, Media Device Architecture, Artificial Intelligence, Game Design

PROJECTS

Infiltrator | *p5.js, JavaScript* April 2026 – May 2026

- Designed and developed a WarGames-inspired investigative deduction game in p5.js, released on itch.io
- Engineered a scene-based state machine to manage transitions across six distinct game screens, including a fully rendered CRT television interface with phosphor glow, scanlines, and an animated typewriter boot-up sequence
- Built three interactive clearance minigames (identity tag drag-and-drop, wire cross-connection, and globe continent mapping) that act as procedural task gates players must clear before unlocking the accusation phase
- Iterated on playtest feedback by rewriting the in-game instructions so that every investigation step was clearer

Reef Rescue | *C* October 2026

- Designed and programmed a Game Boy Advance game in C where a crab collects pearls while dodging jellyfish
- Rebuilt the game from Mode 3 rectangles into Mode 4 with palette-based image art and added a scoreboard state with a persistent high score, using object pooling and DMA transfers to keep drawing fast on the GBA hardware

JobConnect | *Django, Python* September 2026 – Present

- Developing a Django job platform on a 5-person team with job seeker, recruiter, and administrative user roles
- Built the platform's Administrator role for managing user accounts and role assignments, along with moderation tools that let administration review and remove job posts to keep job listings free of spam and abusive content
- Produced design diagrams for the project and coordinated feature work with four teammates through GitHub

"DOOM" BulletHell | *Python, Pygame* June 2024 – July 2024

- Created a 2D bullet-hell game in Python and Pygame with dynamic enemy AI and complex bullet trajectories
- Programmed randomized spawn locations and multiple enemy types to boost game difficulty and replayability
- Collaborated with a team of 3 developers via virtual meetings to align code and assets on a "DOOM" aesthetic

EXPERIENCE AND LEADERSHIP

YMCA | *STEM Event Vendor* August 2024 – Present

- Organized and facilitated STEM-themed educational booths at 3 large-scale community events across Metro Atlanta, engaging 100-150 youth participants through in-depth live demonstrations
- Designed hands-on STEM activities to promote collaborative problem solving and scientific curiosity in youth

YMCA | *Membership Representative* August 2024 – July 2025

- Secured 5-7 new memberships weekly through targeted sales strategies and facility tours to drive engagement
- Resolved technical website and application issues for users, directly improving the digital customer experience

Pool Manager – Sigma Nu Fraternity October 2025 – Present

- Managed and maintained a 20,000-gallon fraternity pool to ensure a safe, fully operational recreation facility

SKILLS

- Languages: Java, Python, JavaScript, C, C# | Tools: p5.js, Django, Pygame, NumPy, Git, GitHub
